Objective

Senior PHP (Laravel) Developer with 3+ years of experience in building secure and scalable web applications using LAMP stack. Skilled in developing MLM systems, eCommerce platforms, and REST APIs. Comfortable with both backend and frontend development using Laravel, JavaScript, and modern UI frameworks. Focused on performance, clean code, and solving real-world problems.

Skills

- HTML5/CSS3
- JavaScript
- jQuery
- Bootstrap
- Tailwind CSS
- PHP (Core & OOP)
- Laravel Framework
- CodeIgniter Framework
- MySQL
- REST API Development
- Database Design & Optimization
- Web Security
- API Security
- JWT/Session Based Authentication
- Style Optimization
- Code Debugging

Experience

- **Encrypt Intelligence Private Limited** 01/2024 - Present
PHP Laravel Developer
 - Developed and maintained web applications using Laravel, with expertise in both frontend and backend development.
 - Designed and implemented RESTful APIs for various applications and integrated third-party APIs as required.
 - Built and optimized complex logic and algorithms for dynamic features in CRM, MLM systems, E-commerce, Cab Booking, Food Delivery, and Gambling platforms.
 - Development scalable Laravel application supporting 5,000+ active users.
 - Created custom logic for MLM-type projects based on unique client plans and business structures.
 - Independently managed full-stack development for several large-scale projects, ensuring efficiency, scalability, and security.
 - Optimized database queries, improving performance by 30%
 - Built secure REST APIs with JWT authentication
 - Reduced system bugs by 40% through debugging & optimization
 - Solved diverse technical challenges, enhanced performance, and ensured smooth user experience.
 - Collaborated with cross-functional teams and clients to deliver tailored software solutions.
- **Sheisa Technologies LLP** 02/2023 - 07/2023
Web Designer
 - Worked as a frontend web designer, focusing on responsive and user-friendly website layouts.
 - Designed and implemented clean UI using HTML, CSS, JavaScript, and Bootstrap.
 - Collaborated with backend developers and designers to translate design concepts into interactive web pages.
 - Ensured cross-browser compatibility and optimized pages for performance and SEO.
 - Actively participated in UI/UX improvements based on user feedback and project requirements.
 - Gained practical experience in web standards, design consistency, and usability.

Projects

- **Multi-Vendor E-commerce Platform**
 - Built using Laravel & MySQL
 - Implemented vendor management system
 - Integrated payment gateway (Razorpay/Stripe)
 - Handling 5000+ products

- **MLM System**

- Designed binary & level income logic
- Implemented secure wallet & transaction system
- Developed auto-placement & spillover algorithm for team structure balancing
- Built cron-based automated payout system with weekly/monthly settlement
- Optimized recursive tree queries for fast downline calculation
- Implemented fraud detection logic to prevent multi-account and abnormal earnings

Tools & Technologies

- Git, Postman, VS Code, cPanel, aaPanel, Linux, Apache, nginx, Docker

Education

- **Manipal University Jaipur** 2026
MCA in Cyber Security
- **University of Gour Banga (NMMC)** 2024
Bachelor of Arts (B.A.)

Certification

- **Mastering Laravel Framework and PHP**
Issued by: Board Infinity – April 2025
Credential ID: RSTUUSH9TJV9
Mastered Laravel MVC framework, including routing, authentication, and full-stack PHP web development.

Languages

- English (Professional Proficiency)
- Bengali (Native)
- Hindi (Conventional)
